South Africa is making significant strides in enhancing its digital infrastructure. The recent upgrades to network power grids and 5G technology are crucial for the country's progress

¿Qué deberían hacer las empresas locales para prepararse para el 5G en Sudáfrica? ¿Existen casos de uso prácticos y de corto plazo para 5G en las empresas de Sudáfrica?

MTN South Africa and Ericsson have completed a landmark 5G core modernisation project, deploying cloud-native solutions to boost network performance, automation, and agility.

Ericsson is continuously enhancing its 5G Transport portfolio with new products and SW features to improve energy efficiency. Our latest transport products are designed with low energy consumption

As part of its 5G 2024 deployment programme, the company has rolled out 5G across more than 900 sites, with a focus on utilising the midband spectrum to expand coverage

South Africa was the first country in the region to launch 5G, and has since been joined by a handful of countries: Seychelles, Zimbabwe, Botswana, Mauritius, Madagascar, and Togo.

Ericsson and MTN Group have agreed to modernize the core network infrastructure of MTN's telecom operators in South Africa and Nigeria over the next five years.

The modernization brings a range of benefits to South Africa's mobile infrastructure including reduced latency, enhanced data throughput, and strengthened overall user

The Fifth Generation (5G) Council Committee of the Independent Communications Authority of South Africa (ICASA/Authority?) was tasked with preparing an annual report on the current status of 5G in
