La respuesta corta es sí, es posible utilizar paneles solares sin estar conectados a la red eléctrica. Esto se conoce como sistemas fotovoltaicos aislados, o sistemas solares off-grid.

Learn how to design, install & maintain your own solar panel system. Complete DIY guide with permits, costs, safety tips & step-by-step installation.

A solar panel will not turn solar energy into direct current until there is a circuit. If there is no circuit, the solar panel will just sit there as the photons will not be converted into electricity.

However, you can often build a photovoltaic solar installation without battery storage. Such direct or direct-drive solar systems are cheaper, quicker, and easier to make. A

If you're curious about solar panel mechanics or want to save money on solar, you can create your own panels. Here's how to build a solar panel, step by step.
