In consultation and agreement with the Public Utilities Board (PUB) of Kiribati, this study will combine project proposals submitted to PUB for grid expansion and assess system stability in response to the

A rooftop solar installation, coupled with a battery energy storage system (BESS), can provide reliable, clean power for operations, reducing reliance on a potentially unstable grid and

The Project will enable the installation of 5 MW of solar PV, and 13.0 MWh battery energy storage system (BESS), associated network connections and modern control systems on the Bonriki Water

Through the installation of solar-powered water farms, the foundation is not only addressing water insecurity but also empowering local women and youth to lead the way in climate

Discover how South Tarawa's rural communities are adopting rooftop photovoltaic panels paired with Battery Energy Storage Systems (BESS) to overcome energy poverty.

On September 6, 2022, Sino Soar Hybrid (Beijing) Technology Co., Ltd. received the bid award notification from the Kiribati Public Utilities Authority (PUB) and successfully won the bid for the

The project involves the installation of rooftop solar photovoltaic (PV) hybrid systems with battery energy storage systems (BESS), intended to provide seamless and uninterrupted power supply to selected

STREP aims to strengthen Kiribati's renewable energy capacity through the installation of solar photovoltaic (PV) generation systems, a battery energy storage system (BESS), and institutional

The increased financing enabled the increase in the scope and size of the solar photovoltaic (PV) and battery energy storage system (BESS) capacities compared with the IP figures.
